

Q: Are you coming off the cloud yet?

A: yes.

Q: What do you see down there below you?

A: a bunch of red rocks.

Q: Right, look around you and see what else do you see around yourself? Can you see what's around you?

A: It's just like red dirt, red dessert.

Q: Alright, well let's go ahead and look down at your feet; do you see what you're wearing on your feet?

A: I don't, my feet are bare.

Q: Right, let's look at your body; tell me what you are wearing on your body. Is there any type of clothes that is on your body? Tell me what you see. You can talk to me, it's alright. What do you see?

A: I see...Just like a blanket thing over my head. Wrapped around me, I think I've got some sort of cloth on. It's kind of like blankets or not even, it doesn't look fitted, you can tell it's not really a dress, it's just... Its loose clothes. I have something around my head, so I can't tell.

Q: Do you think you're a female or are you a male? What does it feel like?

A: Female.

Q: Do you think you are young or your older or middle age?

A: Mid twenty's

Q: Does the body feel healthy to you?

A: I think I'm pregnant.

Q: And that maybe explains why the clothes are loose.

A: Yes, it's like healthy but I think I'm running away, I'm all alone in the middle of this desert.

Q: Who are you running away from? Do you know?

A: It's a man. Almost looks like a Roman soldier.

Q: Is he trying to chase you? Is he chasing you?

A: I don't see him around.

Q: Oh I see, but you're running around from him but he is not around where you are. Oh I see. DO you think he's possibly the father of the baby? Or maybe he's your husband.

A: Maybe, yeah.

Q: How far along in the pregnancy you are? Do you know?

A: Six or seven months.

Q: Do you know where you're running to?

A: Water.

Q: And what are you going to do when you get to that water?

A: I'm just looking for water, I don't know that I have a solid plan but, I'm thirsty and scared and..

Q: Oh I see. Let's go back a little bit in time and see what happened that made you to run away. We'll go back to that time that made you to run away. Tell me what happened that made you to run away. What has happened that you wanted to run away? Can you find out?

Q: Let's go back and see the place where you live. We're just going to look from the outside of it, the place where you live when you are this pregnant lady. We're going to go and see your house where you live and I want you to describe it to me. What does it look like?

A: Its looks like a mud house, it's built into the side of something.

Q: Is it big or small?

A: Small and it's like a bunch of other homes also built into this...

Q: Kind of like a mountain maybe or something?

A: yeah, it different, it's not rocky its ...

Q: like clay?

A: Yeah.

Q: Do you live there by yourself? Let's look at maybe the dinner time when the whole family is gathered together and tell me who do you see at the dinner table?

A: I see that guy; he has reddish hair, a beard.

Q: Do you know your connection to him?

A: Yeah, we're married.

Q: DO you love him?

A: No, not at all.

Q: Was that kind of a prearranged marriage?

A: Yeah, I clearly didn't have any choice in and I don't even know that we speak the same language, it's weird, it's like he's this soldier or something or guard or... he's huge, he's this big...

Q: Big man?

A: Brawny man and I have different coloring and different skin; I think even a different language.

Q: So he's not from the same town you're from? It looks like it.

A: Yeah.

Q: Who else do you see at the dinner table besides you?

A: Nobody.

Q: So it's just you and him. Can you tell me what are you eating?

A: It's like a stew, its meat and vegetable and soup and bread.

Q: is there anyone else living in the house with you or is it just you and him?

A: I think it's just us.

Q: Can you tell me what the house looks like inside, tell me the interior, what do you see?

A: It's dark, it's round, it's not square walls or anything literally built into this hill and its just a couple of little rooms and then the front of the house is where the windows are, they're just open. It's a warm hot climate.

Q: So it doesn't get cold.

A: Not right now.

Q: So that probably explains for the loose clothes that you have so you don't get that hot.

A: Yeah.

Q: Do you know who you're going to have? Girl or boy?

A: I think a girl.

Q: What do you do with the majority of your time there?

A: I take care of the house and I... It's weird, I think I like the village, and it seems that he's the one out of place, which would be weird.

Q: But is he good to you? Is he being good to you? Is he a good husband?

A: Yeah, I don't think he's terrible to me, I think he's a brutal person though, I think he's...

Q: Maybe things that he does.

A: Yeah, he's corrupt or you know whatever job he has, he's bad.

Q: But that's just something he has to do, right?

A: Yeah, I don't think he's mean. I just think I don't want to stay with him, but I don't have options or I don't have a family or support or money or power.

Q: And why were you running away from him?

A: I don't want to have the baby there. I just want to get away from him; I don't want him to be around my baby.

Q: You decided to leave, that's why you were running away. Where do you think you're running towards? Let's go forward a little bit and let's see where you were running. Let's go to that time where you had the plan and you figure out where you're running, let's go there now, and tell me what you see.

A: I must be running trying to get back home so, that must not have been my village or I would have had people there.

Q: Right, so you're running back to your parents?

A: Yeah.

Q: Let's go ahead and get to that time where you found parents when you went back home and you found your parents and you're there. Tell me what you see?

A: No, I don't think I make it.

Q: What happens?

A: I think I die. I don't even think I gave birth.

Q: Let's go see that day when you died. Tell me what you're experiencing, tell me what you see and remember we can just look and observe, you will be just an observer, there is going to be no physical discomfort, your just looking, and observing. Tell me what happens.

A: I'm just like laying against this rock, I think they found me but like my tongue is swollen, so thirsty, sores all over my body, and I didn't bring enough supplies, or I got lost or it just didn't work out like I thought.

Q: Are you still pregnant?

A: Yeah.

Q: You're still alive, are you already have died?

A: No, I'm going to die. I'm dying of thirst, hunger, exposure to the sun, I can't even walk.

Q: Now that whatever happened has already and you are on the other side of it, from that position, can you look back at the entire life and see it from a different perspective? Every life has a purpose and a lesson and as you look at that life, what did you learn from it?

A: I definitely learnt courage.

Q: What do you think was the purpose of that life?

A: It just seems sad; it was such a short life.

Q: But that was good, you learnt courage, which was very good.

A: Yeah, maybe yeah. Whatever got me into that situation with him, I found the courage to turn my child to me, maybe even though I died it was just to be brave and to not be a victim,

Q: Right, and you didn't want to stay with him and give in to the things that he was doing.

A: I kind of took my life back even though I died.

Q: Well that's very good. Now may I speak to A. subconscious please? Do I have the permission to speak to A. subconscious please?

A: Yes.

Q: I respect the power of subconscious because I know that subconscious takes care of A. body and does a very good job of it. I also know that subconscious has every record of everything that has ever happened to A. in this lifetime and all the other lifetimes she has ever lived. SO, I respect the power of subconscious and I always ask for permission to speak to it and ask questions. Do I have a permission to ask questions?

A: Yes.

Q: I know the subconscious could have chosen many different lifetimes for A. to see today, you chose to bring forward this particular lifetime for her to see. Why did you pick this lifetime?

A: Completion

Q: Completion of what? Can you elaborate? Can you tell me what you mean of completion of what?

A: A series of lifetimes.

Q: Right, but we're talking about this particular lifetime when she was a pregnant lady and she ran away from her husband and she died. What was the purpose of that life? What was the reason why you chose that particular lifetime for her to see?

A: To show her bravery.

Q: And did she learn the lesson from that particular lifetime?

A: Yes.

Q: Now I would like to do today is I would like to see if we can access one of A. children, her older boy named T. Is there a possibility to access his sub consciousness where we can talk to his sub consciousness? We would like to do some healing on his body and we were wondering can we go through A. and access T. subconscious please.

A: Yes.

Q: Thank you. Am I speaking to T. subconscious right now?

A: Yes.

Q: We have a few questions that we would like to ask, T. has a rash on his body and his face. Is that correct?

A: Yes.

Q: Can you tell us where the rash is coming from? Why he has the rash?

A: Lymph nodes.

Q: Can you tell us what's wrong with the lymph nodes?

A: There's an infection.

Q: And that's causing him to have rash on his body and his face?

A: Yes.

Q: do you think that you can heal the infection or take the infection so he doesn't have the rash? Is it possible?

A: Yes.

Q: Thank you. We also have questions for T., we believe that he has had damage from the vaccinations when he was younger. His mother A. has taken him to get some vaccinations done and there were a lot of them in a short period of time. Can you tell me if those vaccinations had a negative effect on his body?

A: Yes.

Q: Can you tell me which way it was negative? What has it done?

A: Its hard on the organs and the brain, blood.

Q: Should we continue to use vaccinations or should we really not be doing the vaccinations here on Earth?

A: No.

Q: So, the vaccination is not a good thing to do?

A: No.

Q: Can you please reverse the damage that's been done by vaccinations? Is that possible? I know that you can do a lot of things. Is there any chance that you can reverse the damage that's been done by vaccinations?

A: No.

Q: I am curious. Why not?

A: It's a complex system and it alters him and it's not fixable, it's part of who he is.

Q: Can you elaborate on that a little bit, I do not understand what you mean by that.

A: It changes who you are, it attaches to cells and organs and blood, and it changes how a person grows.

Q: You mean the vaccines, the liquid that was in the vaccines you mean attaches to the organs.

A: Yes, it creates a response system in his body and you can't ever undo, it changes, it's not a question of undoing it because he's immune system is different today because of it.

Q: Now he has motor delays and he gets seizures, is that because of the vaccinations?

A: Partly, it's an internally connected situation it is because of that and other things.

Q: What other things do you mean?

A: Something's from consumption and while in the womb and then triggered by the vaccines which then partner up and creates situations in his body.

Q: what do you mean by when he was in the womb? Did something happen physically with A. while she was pregnant or do you mean the contracts that T. had to come in to choose this particular life, what do you mean?

A: Yes he chose all of it and in the womb his body wasn't fully nourished.

Q: While he was in the womb?

A: Yes and his mother carried fear and anger.

Q: What was that fear and anger about? Was it towards someone or what was she fearing and angry about?

A: She was fearful of the birth and of being a mom.

Q: Oh I see, well that's understandable.

A: Yeah.

Q: A lot of women go through that. Was that A. first time to give birth to a baby on earth or has she done it in previous lives?

A: She's done it in previous lives

Q: And she still was holding on to that fear of going through that again.

A: Yes. That past life she lost the baby before she died.

Q: So that's why you showed her this past life, you're brilliant. So when she was giving birth to T., that fear from that past life is continuing to move on into this life when she was pregnant with T. ?

A: And as such that the baby is aware..

Q: of the fears?

A: Yes and he carries that from then and through birth and with that he's more vulnerable so to correct the vaccine damage is not possible.

Q: So this was not A. fault, to inflict the vaccines on her son?

A: No.

Q: I didn't think so.

A: It's all planned as more healing for both of them.

Q: What do you mean by that? What healing do you mean?

A: You have the pregnancy and the fears and then body cellular remembers and that gets past over to the baby which then makes the baby vulnerable.

Q: So basically you're saying this is their lessons that they have to learn and overcome the fears through what they're experiencing now.

A: Yes and then lesson for life is courage and bravery not fears. The fear must be addressed as that was not the purpose of the life.

Q: Can you specify what fears we are talking about here.

A: The fear of the pain and the horror of childbirth.

Q: Now A. still is trying to help T. to be able to not have those issues, to be able to function better in life here on earth, is there anything that she can do to help him?

A: Yes.

Q: What is it that she can do?

A: It's all in releasing the fear.

Q: Can you help us in suggesting what would be the best way to release the fears.

A: I don't know.

Q: Now I'm talking to A. subconsciousness at this time or T. subconsciousness, who is present here? I am asking for T. conscious mind to step out of the way and let me talk to his subconscious please. Can I talk with T. subconscious please? T. conscious mind please step out of the way and please allow me to talk to your subconscious mind.

A: I think that's out.

Q: Alright so, A. subconscious mind is present right now? Am I talking to A. subconscious?

A: Yes.

Q: I'm asking A. conscious mind to stay out of the way and allow me to talk to A. subconscious. So we were talking to T. subconscious mind right just a minute ago? Now I am talking to A. subconscious mind is that correct?

A: Yes, we're both here [laughs]

Q: Then I'm asking A. conscious mind to stay out of the way. You can move out to the side and just be an observer and watch but, you're not allowed to interfere. I am only talking to A. subconscious mind. A. subconscious mind are you here? I'm only talking to A. subconscious, is A. subconscious mind here?

A: Yes

Q: To go back to T., there is nothing that you can do to heal the damage from his vaccinations, is that correct?

A: That is correct and its much to complex and you can heal symptoms of the vaccines and you can heal trauma regions of the vaccines but, you can never undo completely as they are completely woven into his entire system.

Q: I've heard that you can reverse the damage of vaccines as long as the child is still of a young age.

A: No.

Q: No, that's not true either?

A: You can reverse some of the apparent symptoms and trauma from the vaccine but, you never reverse...The damage that's been done. Sometimes yes you can reverse the damage but, the vaccines weave into the DNA and it's all going to be with them forever in that life and there will always be response symptoms because of that.

Q: Can you tell us why the vaccinations are so prevalent in this life on earth? Why are we forced to have the vaccinations on our children?

A: It's a repeat of an old ancient practice, its chemical engineering on humans. It's changing of the cellular structure in DNA by more primitive minds and ...

Q: Do we know who's trying to do that on us? Do you know what race that's trying to do that on us?

A: It's not a specific race, its many people from several countries and this has been done before by more advanced civilizations, it's quite ... Embedded. It's experimental and they're astounded at the response of the human body.

Q: Are you saying that that's the humans that are doing experiments or there is a different race from a different civilization that is inflicting that on humans through humans?

A: They're humans from all different... it's not one foreign race; it's a group from several different nations that are trying to manipulate and control.

Q: So the vaccines are basically done so that this group of humans are able to manipulate and control us? Is that correct?

A: Yes. Control our chemical responses and how the body works and how the DNA works.

Q: As far as I know after the Atlantis has gone under water the humans DNA was reversed to two strands, is that correct?

A: That's changing.

Q: Right, right now the human DNA is changing.

A: Yes.

Q: What you're trying to tell us is that through these vaccinations, this group of humans that are in control are trying to stop the reverse of human DNA?

A: No and the two strands.. There's more, it's simply not fully understood yet and they're trying to recreate what was done in Atlantis and other civilizations where they could genetically control and breed and manipulate a mass populations to create and be very predictable and very controllable but, they are not as advanced as Atlantis is and the humans are not responding the way they should. These children are not as sick as they should be and it's not working out the way they thought.

Q: And that's why they are trying to spread the word that there the worst flu going around right now so that more people would get flu vaccinations, is that correct?

A: And fear.

Q: They're spreading the fear through these illnesses but, that's really not the truth.

A: No and it's the human body, these children are defaulting, they're not responding in predictable patterns.

Q: Right because most of these new children are coming in with a completely different DNA

A: Yes

Q: and they are rated different so that's why their bodies... that makes sense why their body is not responding to these chemicals as they thought that they would.

A: Yes.

Q: So the message that really we should send out there is for mom's, for pregnant women do not vaccinate their children.

A: Yes. And then the two strands DNA is not correct.

Q: can you look at A. body and tell me how many strands in her DNA she has right now.

A: I think six.

Q: That's great and can you take a look at her children and see how many they have?

A: Tony.8, Paige 12, Alex 6.

Q: And what about her husband?

A: 4

Q: Is there a way that you can look at my body and see how many DNA strands I have developed?

A: 8

Q: and out of curiosity, can you take it like my daughter Samantha, can you see how many?

A: 12

Q: I had a feeling that her DNA is fully developed as well. Can you take a look at Seth who has autism?

A: I want to say 16

Q: 16? Wow, that's interesting.

A: Seth looks different, its more.. It looks different, it's snaikey, it doesn't form the same shape as the others.

Q: Oh, interesting. So we have more than 12 strands in our DNA's, that's what you're telling me?

Q: Are you coming off the cloud yet?

A: yes.

Q: What do you see down there below you?

A: a bunch of red rocks.

Q: Right, look around you and see what else do you see around yourself? Can you see what's around you?

A: It's just like red dirt, red dessert.

Q: Alright, well let's go ahead and look down at your feet; do you see what you're wearing on your feet?

A: I don't, my feet are bare.

Q: Right, let's look at your body; tell me what you are wearing on your body. Is there any type of clothes that is on your body? Tell me what you see. You can talk to me, it's alright. What do you see?

A: I see...Just like a blanket thing over my head. Wrapped around me, I think I've got some sort of cloth on. It's kind of like blankets or not even, it doesn't look fitted, you can tell it's not really a dress, it's just... It's loose clothes. I have something around my head, so I can't tell.

Q: Do you think you're a female or are you a male? What does it feel like?

A: Female.

Q: DO you think you are young or your older or middle age?

A: Mid twenty's

Q: Does the body feel healthy to you?

A: I think I'm pregnant.

Q: And that maybe explains why the clothes are loose.

A: Yes, it's like healthy but I think I'm running away, I'm all alone in the middle of this desert.

Q: Who are you running away from? Do you know?

A: It's a man. Almost looks like a Roman soldier.

Q: Is he trying to chase you? Is he chasing you?

A: I don't see him around.

Q: Oh I see, but you're running around from him but he is not around where you are. Oh I see. DO you think he's possibly the father of the baby? Or maybe he's your husband.

A: Maybe, yeah.

Q: How far along in the pregnancy you are? Do you know?

A: Six or seven months.

Q: Do you know where you're running to?

A: Water.

Q: And what are you going to do when you get to that water?

A: I'm just looking for water, I don't know that I have a solid plan but, I'm thirsty and scared and..

Q: Oh I see. Let's go back a little bit in time and see what happened that made you to run away. We'll go back to that time that made you to run away. Tell me what happened that made you to run away. What has happened that you wanted to run away? Can you find out?

Q: Let's go back and see the place where you live. We're just going to look from the outside of it, the place where you live when you are this pregnant lady. We're going to go and see your house where you live and I want you to describe it to me. What does it look like?

A: Its looks like a mud house, it's built into the side of something.

Q: Is it big or small?

A: Small and it's like a bunch of other homes also built into this...

Q: Kind of like a mountain maybe or something?

A: yeah, it different, it's not rocky its ...

Q: like clay?

A: Yeah.

Q: Do you live there by yourself? Let's look at maybe the dinner time when the whole family is gathered together and tell me who do you see at the dinner table?

A: I see that guy; he has reddish hair, a beard.

Q: Do you know your connection to him?

A: Yeah, we're married.

Q: DO you love him?

A: No, not at all.

Q: Was that kind of a prearranged marriage?

A: Yeah, I clearly didn't have any choice in and I don't even know that we speak the same language, it's weird, it's like he's this soldier or something or guard or... he's huge, he's this big...

Q: Big man?

A: Brawny man and I have different coloring and different skin; I think even a different language.

Q: So he's not from the same town you're from? It looks like it.

A: Yeah.

Q: Who else do you see at the dinner table besides you?

A: Nobody.

Q: So it's just you and him. Can you tell me what are you eating?

A: It's like a stew, its meat and vegetable and soup and bread.

Q: is there anyone else living in the house with you or is it just you and him?

A: I think it's just us.

Q: Can you tell me what the house looks like inside, tell me the interior, what do you see?

A: It's dark, it's round, it's not square walls or anything literally built into this hill and its just a couple of little rooms and then the front of the house is where the windows are, they're just open. It's a warm hot climate.

Q: So it doesn't get cold.

A: Not right now.

Q: So that probably explains for the loose clothes that you have so you don't get that hot.

A: Yeah.

Q: Do you know who you're going to have? Girl or boy?

A: I think a girl.

Q: What do you do with the majority of your time there?

A: I take care of the house and I... It's weird, I think I like the village, and it seems that he's the one out of place, which would be weird.

Q: But is he good to you? Is he being good to you? Is he a good husband?

A: Yeah, I don't think he's terrible to me, I think he's a brutal person though, I think he's...

Q: Maybe things that he does.

A: Yeah, he's corrupt or you know whatever job he has, he's bad.

Q: But that's just something he has to do, right?

A: Yeah, I don't think he's mean. I just think I don't want to stay with him, but I don't have options or I don't have a family or support or money or power.

Q: And why were you running away from him?

A: I don't want to have the baby there. I just want to get away from him; I don't want him to be around my baby.

Q: You decided to leave, that's why you were running away. Where do you think you're running towards? Let's go forward a little bit and let's see where you were running. Let's go to that time where you had the plan and you figure out where you're running, let's go there now, and tell me what you see.

A: I must be running trying to get back home so, that must not have been my village or I would have had people there.

Q: Right, so you're running back to your parents?

A: Yeah.

Q: Let's go ahead and get to that time where you found parents when you went back home and you found your parents and you're there. Tell me what you see?

A: No, I don't think I make it.

Q: What happens?

A: I think I die. I don't even think I gave birth.

Q: Let's go see that day when you died. Tell me what you're experiencing, tell me what you see and remember we can just look and observe, you will be just an observer, there is going to be no physical discomfort, your just looking, and observing. Tell me what happens.

A: I'm just like laying against this rock, I think they found me but like my tongue is swollen, so thirsty, sores all over my body, and I didn't bring enough supplies, or I got lost or it just didn't work out like I thought.

Q: Are you still pregnant?

A: Yeah.

Q: You're still alive, are you already have died?

A: No, I'm going to die. I'm dying of thirst, hunger, exposure to the sun, I can't even walk.

Q: Now that whatever happened has already and you are on the other side of it, from that position, can you look back at the entire life and see it from a different perspective? Every life has a purpose and a lesson and as you look at that life, what did you learn from it?

A: I definitely learnt courage.

Q: What do you think was the purpose of that life?

A: It just seems sad; it was such a short life.

Q: But that was good, you learnt courage, and that was very good.

A: Yeah, maybe yeah. Whatever got me into that situation with him, I found the courage to turn my child to me, maybe even though I died it was just to be brave and to not be a victim,

Q: Right and you didn't want to stay with him and give in to the things that he was doing.

A: I kind of took my life back even though I died.

Q: Well that's very good. Now may I speak to A. subconscious please? Do I have the permission to speak to A. Subconscious please?

A: Yes.

Q: I respect the power of subconscious because I know that subconscious takes care of A. body and does a very good job of it. I also know that subconscious has every record of everything that has ever happened to A. in this lifetime and all the other lifetimes she has ever lived. SO, I respect the power of subconscious and I always ask for permission to speak to it and ask questions. Do I have a permission to ask questions?

A: Yes.

Q: I know the subconscious could have chosen many different lifetimes for A. to see today, you chose to bring forward this particular lifetime for her to see. Why did you pick this lifetime?

A: Completion

Q: Completion of what? Can you elaborate? Can you tell me what you mean of completion of what?

A: A series of lifetimes.

Q: Right, but we're talking about this particular lifetime when she was a pregnant lady and she ran away from her husband and she died. What was the purpose of that life? What was the reason why you chose that particular lifetime for her to see?

A: To show her bravery.

Q: And did she learn the lesson from that particular lifetime?

A: Yes.

Q: Now I would like to do today is I would like to see if we can access one of A. children, her older boy named T. Is there a possibility to access his sub consciousness where we can talk to his sub consciousness? We would like to do some healing on his body and we were wondering can we go through A. And access T. subconscious please.

A: Yes.

Q: Thank you. Am I speaking to T. subconscious right now?

A: Yes.

Q: We have a few questions that we would like to ask, T. has a rash on his body and his face. Is that correct?

A: Yes.

Q: Can you tell us where the rash is coming from? Why he has the rash?

A: Lymph nodes.

Q: Can you tell us what's wrong with the lymph nodes?

A: There's an infection.

Q: And that's causing him to have rash on his body and his face?

A: Yes.

Q: do you think that you can heal the infection or take the infection so he doesn't have the rash? Is it possible?

A: Yes.

Q: Thank you. We also have questions for T., we believe that he has had damage from the vaccinations when he was younger. His mother A. has taken him to get some vaccinations done and

there were a lot of them in a short period of time. Can you tell me if those vaccinations had a negative effect on his body?

A: Yes.

Q: Can you tell me which way it was negative? What has it done?

A: Its hard on the organs and the brain, blood.

Q: Should we continue to use vaccinations or should we really not be doing the vaccinations here on Earth?

A: No.

Q: So, the vaccination is not a good thing to do?

A: No.

Q: Can you please reverse the damage that's been done by vaccinations? Is that possible? I know that you can do a lot of things. Is there any chance that you can reverse the damage that's been done by vaccinations?

A: No.

Q: I am curious. Why not?

A: It's a complex system and it alters him and it's not fixable, it's part of who he is.

Q: Can you elaborate on that a little bit, I do not understand what you mean by that.

A: It changes who you are, it attaches to cells and organs and blood, and it changes how a person grows.

Q: You mean the vaccines, the liquid that was in the vaccines you mean attaches to the organs.

A: Yes, it creates a response system in his body and you can't ever undo, it changes, it's not a question of undoing it because he's immune system is different today because of it.

Q: Now he has motor delays and he gets seizures, is that because of the vaccinations?

A: Partly, it's an internally connected situation it is because of that and other things.

Q: What other things do you mean?

A: Something's from consumption and while in the womb and then triggered by the vaccines which then partner up and creates situations in his body.

Q: what do you mean by when he was in the womb? Did something happen physically with A. while she was pregnant or do you mean the contracts that T. had to come in to choose this particular life, what do you mean?

A: Yes he chose all of it and in the womb his body wasn't fully nourished.

Q: While he was in the womb?

A: Yes and his mother carried fear and anger.

Q: What was that fear and anger about? Was it towards someone or what was she fearing and angry about?

A: She was fearful of the birth and of being a mom.

Q: Oh I see, well that's understandable.

A: Yeah.

Q: A lot of women go through that. Was that an A. first time to give birth to a baby on earth or has she done it in previous lives?

A: She's done it in previous lives

Q: And she still was holding on to that fear of going through that again.

A: Yes. That past life she lost the baby before she died.

Q: So that's why you showed her this past life, you're brilliant. So when she was giving birth to T., that fear from that past life is continuing to move on into this life when she was pregnant with T.?

A: And as such that the baby is aware..

Q: of the fears?

A: Yes and he carries that from then and through birth and with that he's more vulnerable so to correct the vaccine damage is not possible.

Q: So this was not A. fault, to inflict the vaccines on her son?

A: No.

Q: I didn't think so.

A: It's all planned as more healing for both of them.

Q: What do you mean by that? What healing do you mean?

A: You have the pregnancy and the fears and then body cellular remembers and that gets past over to the baby which then makes the baby vulnerable.

Q: So basically you're saying this is their lessons that they have to learn and overcome the fears through what they're experiencing now.

A: Yes and then lesson for life is courage and bravery not fears. The fear must be addressed as that was not the purpose of the life.

Q: Can you specify what fears we are talking about here.

A: The fear of the pain and the horror of childbirth.

Q: Now A. still is trying to help T. to be able to not have those issues, to be able to function better in life here on earth, is there anything that she can do to help him?

A: Yes.

Q: What is it that she can do?

A: It's all in releasing the fear.

Q: Can you help us in suggesting what would be the best way to release the fears.

A: I don't know.

Q: Now I'm talking to A. subconsciousness at this time or T. subconsciousness, who is present here? I am asking for T. conscious mind to step out of the way and let me talk to his subconscious please. Can I talk with T. subconscious please? T. conscious mind please step out of the way and please allow me to talk to your subconscious mind.

A: I think that's out.

Q: Alright so, A. subconscious mind is present right now? Am I talking to A. subconscious?

A: Yes.

Q: I'm asking A. conscious mind to stay out of the way and allow me to talk to A. subconscious. So we were talking to T. subconscious mind right just a minute ago? Now I am talking to A. subconscious mind is that correct?

A: Yes, we're both here [laughs]

Q: Then I'm asking A. conscious mind to stay out of the way. You can move out to the side and just be an observer and watch but, you're not allowed to interfere. I am only talking to A. subconscious mind. A. subconscious mind are you here? I'm only talking to A. subconscious, is A. subconscious mind here?

A: Yes

Q: To go back to T., there is nothing that you can do to heal the damage from his vaccinations, is that correct?

A: That is correct and its much to complex and you can heal symptoms of the vaccines and you can heal trauma regions of the vaccines but, you can never undo completely as they are completely woven into his entire system.

Q: I've heard that you can reverse the damage of vaccines as long as the child is still of a young age.

A: No.

Q: No, that's not true either?

A: You can reverse some of the apparent symptoms and trauma from the vaccine but, you never reverse...The damage that's been done. Sometimes yes you can reverse the damage but, the vaccines weave into the DNA and it's all going to be with them forever in that life and there will always be response symptoms because of that.

Q: Can you tell us why the vaccinations are so prevalent in this life on earth? Why are we forced to have the vaccinations on our children?

A: It's a repeat of an old ancient practice, its chemical engineering on humans. It's changing of the cellular structure in DNA by more primitive minds and ...

Q: Do we know who's trying to do that on us? Do you know what race that's trying to do that on us?

A: It's not a specific race, its many people from several countries and this has been done before by more advanced civilizations, it's quite ... Embedded. It's experimental and they're astounded at the response of the human body.

Q: Are you saying that that's the humans that are doing experiments or there is a different race from a different civilization that is inflicting that on humans through humans?

A: They're humans from all different... it's not one foreign race; it's a group from several different nations that are trying to manipulate and control.

Q: So the vaccines are basically done so that this group of humans are able to manipulate and control us? Is that correct?

A: Yes. Control our chemical responses and how the body works and how the DNA works.

Q: As far as I know after the Atlantis has gone under water the humans DNA was reversed to two strands, is that correct?

A: That's changing.

Q: Right, right now the human DNA is changing.

A: Yes.

Q: What you're trying to tell us is that through these vaccinations, this group of humans that are in control are trying to stop the reverse of human DNA?

A: No and the two strands.. There's more, it's simply not fully understood yet and they're trying to recreate what was done in Atlantis and other civilizations where they could genetically control and breed and manipulate a mass populations to create and be very predictable and very controllable but, they are not as advanced as Atlantis is and the humans are not responding the way they should. These children are not as sick as they should be and it's not working out the way they thought.

Q: And that's why they are trying to spread the word that there the worst flu going around right now so that more people would get flu vaccinations, is that correct?

A: And fear.

Q: They're spreading the fear through these illnesses but, that's really not the truth.

A: No and it's the human body, these children are defaulting, they're not responding in predictable patterns.

Q: Right because most of these new children are coming in with a completely different DNA

A: Yes

Q: and they are rated different so that's why their bodies... that makes sense why their body is not responding to these chemicals as they thought that they would.

A: Yes.

Q: So the message that really we should send out there is for moms, for pregnant women do not vaccinate their children.

A: Yes. And then the two strands DNA is not correct.

Q: can you look at A. body and tell me how many strands in her DNA she has right now.

A: I think six.

Q: That's great and can you take a look at her children and see how many they have?

A: Tony.8, Paige 12, Alex 6.

Q: And what about her husband?

A: 4

Q: Is there a way that you can look at my body and see how many DNA strands I have developed?

A: 8

Q: and out of curiosity, can you take it like my daughter Samantha, can you see how many?

A: 12

Q: I had a feeling that her DNA is fully developed as well. Can you take a look at Seth who has autism?

A: I want to say 16

Q: 16? Wow, that's interesting.

A: Seth looks different, its more.. It looks different, it's snaky, it doesn't form the same shape as the others.

Q: Oh, interesting. So we have more than 12 strands in our DNA's, that's what you're telling me?

A: I guess so.

Q: Interesting. Alright that's some very interesting information. Those children that have been vaccinated already, is there anything that we can do for them at this present time?

A: Yes there's much to be done, the question is not.. It's never undoable though. When it's done, it's done and supporting the system to evolve as its already doing, to handle and change how it responds to it and to be strong in spite of it, its needs to be supported and for each person its individual.

Q: But tell me if I'm wrong, it is my understanding that T. for example, he has chosen this particular time and life to come in by his contract so in a way he chose to experience the vaccinations, is that correct?

A: Yes.

Q: Why did he choose to do that, can you tell us?

A: one of his lives lessons is fear and unless he overcomes the fear, nothing will fall in place for him and the vaccines have given him doorways to face those fears, opportunities for more fearful situations.
